PROFESSIONAL SUMMARY

Results-driven Flutter Developer and Software Engineer with 2+ years of professional experience building and shipping cross-platform mobile applications used by real users on Google Play and the App Store. Specialises in Clean Architecture, MVVM, Firebase ecosystem, RESTful API integration, and state management (Provider, Bloc, GetX). Delivered production-ready applications across social networking, AI, ride-sharing, IPTV, and productivity domains for international clients. Committed to clean, maintainable code, strong UX, and continuous professional growth. Open to remote and international opportunities.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter (Android & iOS, Cross-Platform)
Backend & Cloud: Firebase Auth, Cloud Firestore, Cloud Storage, FCM, Supabase, RESTful APIs, GraphQL
State Management: Provider, Bloc, GetX
Architecture: Clean Architecture, MVVM, SOLID Principles, Repository Pattern, Dependency Injection
Version Control & CI/CD: Git, GitHub, GitHub Actions
Testing: Unit Testing, Widget Testing
Tools: Android Studio, VS Code, Postman, Figma
Additional: Google Maps SDK, Push Notifications, Payment Gateway Integration, Performance Optimization, App Store & Play Store Deployment, Debugging

PROFESSIONAL EXPERIENCE

Flutter Developer · Unique Solutions UAE

Dubai, UAE (Remote) | Jul 2024 – Present · 2 years

- Deliver production-ready Flutter applications for international clients across multiple industries.
- Design reusable, maintainable UI component libraries that reduce development time across projects.
- Integrate RESTful APIs, GraphQL, Firebase Auth, Firestore, Cloud Storage, and push notification services.
- Architect scalable solutions following Clean Architecture and MVVM, improving long-term maintainability.
- Manage full app lifecycle from development through Play Store and App Store deployment.

Stack: *Flutter · Dart · Firebase · Supabase · REST APIs · GraphQL · Firestore · Git · GitHub*

Flutter Developer · Coder Space

Lahore, Pakistan (On-site) | Oct 2025 – Apr 2026 · 6 months

- Developed and shipped scalable cross-platform Flutter applications for production environments.
- Built responsive, accessible UIs adhering to Material Design and platform guidelines.
- Integrated Firebase services (Auth, Firestore, Cloud Storage, FCM), RESTful APIs, and GraphQL into mobile applications.
- Applied Provider, Bloc, and GetX state management patterns across multiple projects.
- Maintained clean, modular codebases using Clean Architecture and MVVM.
- Collaborated with cross-functional teams through full delivery cycles including testing and deployment.

Stack: *Flutter · Dart · Firebase · REST APIs · GraphQL · Provider · Bloc · GetX · Git · GitHub*

FEATURED PROJECTS

1. DapUp — *Social Networking · Android & iOS*

Real-time, location-based social platform enabling users to discover nearby people via mutual connections, with instant messaging and interactive social features.

Key Features: Moments Feed · Who's Around · Mutual Contacts · Nearest Mutuals Map · One-to-One & Group Chat · Real-Time Location
Stack: *Flutter · Firebase · Google Maps · REST APIs · Real-Time Messaging · Location Services*
Live: Google Play | App Store

2. SheDrives — *Ride-Sharing Platform · Android & iOS*
Women-exclusive ride-sharing app connecting verified female drivers with female passengers, prioritising safety with live tracking and SOS emergency support.
Key Features: Verified Rides · Live Tracking · SOS Support · Transparent Pricing · Ratings & Reviews · 24/7 Support
Stack: *Flutter · Firebase · Google Maps · REST APIs · Push Notifications*
Live: Google Play | App Store

3. Evoke AI — *AI-Powered Photo Editor · Android & iOS*
Comprehensive AI creative platform for image generation, editing, restoration, and transformation using advanced AI APIs and cloud-based processing.
Key Features: AI Image Generation · Background & Object Removal · Photo Restoration · AI Avatars · Text-to-Image · Image-to-Video · Cloud Gallery
Stack: *Flutter · Firebase · AI APIs · Cloud Storage · REST APIs*
Live: Google Play | App Store

4. Hashtag AI Expert — *AI Productivity Tool · iOS*
AI-powered social media assistant generating optimised hashtags, captions, and content strategies to help creators and businesses maximise online reach.
Stack: *Flutter · AI APIs · Firebase · REST APIs*
Live: App Store

5. Skylink TV — *IPTV Streaming · Android*
Next-generation IPTV streaming app for verified Skylink subscribers, offering seamless live TV access with secure authentication and high-quality playback.
Stack: *Flutter · REST APIs · Video Streaming · Firebase*
Live: Google Play

EDUCATION

B.Sc. Software Engineering · The Islamia University of Bahawalpur (IUB), Pakistan
Sep 2022 – Jun 2026 · GPA: 3.80 / 4.00 (First Class Honours equivalent)
Relevant Coursework: OOP · Data Structures & Algorithms · Database Systems · Mobile Application Development · Artificial Intelligence · Software Quality Assurance · Computer Networks · Cloud Computing · Human-Computer Interaction
